Dry material and water vacuum cleaners

INDUSTRIAL VACUUM CLEANERS

The versatile dry material and water vacuum cleaner vacuums up dirt and water

REMKO RK 75
Dry material and water
vacuum cleaner
Container volume: 60 litres

REMKO RK 26 and RK 26 K dry material vacuum cleaners

Compact units with high capacity

The dry material vacuum cleaners are just as well suited for commercial and private users. The devices convince due to high suction capacities and easy handling. They can be used to vacuum smooth floors, carpets, and upholstery, as well as wooden chips, broken glass, and even rubble. A permanent dirt filter is a part of the standard equipment. The RK 26 K design has a boiler cleaning set.

REMKO RK 45, RK 55, and RK 75 Dry material and water vacuum cleaners

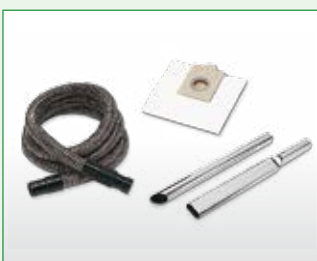

Powerful units for professionals with large container volumes

The dry material and water vacuum cleaners are especially designed for commercial use. The units convince due to concentrated suction force and many possible applications. At construction sites, in industry, craftwork, trade, and wherever very high capacity is required in dry and wet areas.

- Extremely high suction power
- Problem-free transport
- Permanent dirt filter in standard equipment
- Easy to handle
- Problem-free transport
- Extensive accessories
- Container made of stainless steel
- Large tube diameter prevents blockage
- RK 26 K ideal for boiler cleaning
